How many causes of heart disease can you identify? Visit the Healthy Hearts website www.valeofyorkhealthyhearts.co.uk to learn more.

Vale of York's Healthy Hearts

Heart disease is one of the country's biggest killers, claiming more than 66,000 lives a year. There is data to suggest that there may be more people dying prematurely from cardiovascular disease in the Vale of York than in other similar areas of the country.

That's why one of NHS Vale of York Clinical Commissioning Group's main priorities is to reduce the number of deaths caused by heart attack and stroke.

The Vale of York's Healthy Hearts initiative brings local GPs and hospital specialists together to help prevent people having a heart attack or stroke. Together we can beat heart disease!
